

Construction Safety Administration

Classroom Course

This one-day course is designed to provide participants with information about effectively managing and monitoring a construction Health and Safety Management System. This course summarizes and pulls together material from several other mandatory courses in the NCSO and HSA Programs.

Course topics

- Standards for working as an HSE professional
- Project safety planning
- HSE leadership and accountability
- Company health, safety and environmental training
- Records, statistics and trend analysis
- Due diligence and documentation
- Environmental programs
- HSE communications and reports

Certification

This course has a written test component. Participants must achieve a minimum score of 80% on the open-book written test for course certification.

Prerequisites

- Alberta OH&S Legislation Awareness
- Principles of Health & Safety Management
- Auditor Training
- Leadership for Safety Excellence
- WHMIS Train-the-Trainer
- Work Site Investigation Basics
- Basic Instructional Techniques
- Communication and Ethics for the Safety Leader

Please call the ACSA to register for this course.

This course is also available in an online e-learning format.
