Industry Code: 30302
Overhead Doors – Install/Repair

This document is a guideline only. Employers have a responsibility of assessing all applicable occupational health and safety legislation, for the tasks they are performing.

This industry is for businesses that install or repair overhead doors and roll shutters.

Task description	Type of equipment used and workers employed
<p>Overhead doors for industrial buildings, warehouses and residential garages while roll shutters are an exterior window covering used for light and energy control along with security applications.</p> <p>Doors are manufactured in sections that require assembly and erection, and most would operate on a spring system, either mechanically or by remote (with motor). Repair can involve panel, spring and motor replacement, balancing and leveling along with track adjustments.</p> <p>The installation of roll shutters is quite similar to that of overhead doors.</p>	<p>Equipment used include hand tools, scaffolding or elevated work platforms.</p> <p>Overhead doors may be constructed of wood, metal or fiberglass and come from the manufacturer in sections. The doors are equipped with rollers, rails, and springs.</p>
<p>Sale and installation of windows and hinged passageway doors as well automatic and sliding doors for commercial applications.</p> <p>Retail display areas with sales of related door hardware.</p>	<p>Equipment used include hand tools and portable ladders.</p>

Relevant sections of OHS Legislation:

Occupational Health and Safety Act

- Section** 3,4,5 Obligations of employers, workers, etc.
- 40 Serious injuries and incident
- 18 Investigation of accidents
- 36 Discriminatory action complaint
