

Prime Contractor

Classroom Course

This one-day course is designed for employers and workers who need a clear understanding of how responsibilities are divided on multi-employer sites. This course is targeted for construction industry work sites and is based on Alberta's OHS legislation for Prime Contractor.

Course Topics

- Prime contractor requirements and obligations
- Owner obligations and pre-qualifications
- Bid package and contract specifications
- Systematic approach for contractor management
- Project management health and safety plan

Certification

This course has a written test and case study workshop. Participants must achieve a minimum score of 80% on a closed-book written test and complete a case study for course certification.

Prerequisites

None required at this time.
