

Alberta Temporary Traffic Control – Field Application

Classroom Course

This one-day course provides participants with information regarding how to safely plan, erect, and dismantle temporary traffic control devices in Alberta. Flagger Train the Trainer certification is recommended as flagging procedures are not covered in this course.

Course topics

- Traffic control plans
- Components of the traffic control zone
- Hazard assessments and creating safer work zones
- Responsibilities of the traffic control person
- Temporary traffic control signs and devices
- Erecting and removing signage and/or barricades
- Loading and transporting traffic control devices
- Device maintenance and recordkeeping practices

Certification

This course has a written test component only. Participants must achieve a minimum score of 80% on an open-book written test for course certification.

Prerequisites

None required at this time.
