Industry Code: 09902
Cleaning Services – Mobile Pressure

This document is a guideline only. Employers have a responsibility of assessing all applicable occupational health and safety legislation, for the tasks they are performing.

Task description	Type of equipment used and workers employed
Businesses which perform a "pigging" service on internal piping systems, such as gas plants, refineries, municipal water lines, etc. are classified in this industry. The "pig" is inserted into the piping system by way of a "pig launcher", which is an access hole to the inlet and outlet pipes of the system, "Pigging" of piping systems is a method of cleaning piping systems in gas plants, refineries, etc., using liquid under pressure (generally using truck mounted pressure units), which pushes the flexible "pig" through the pipes	Mobile cleaning services conducted with the use of truck-mounted tanks equipped with pressure pumps that eject water, steam, air or hot oil for industrial, commercial or oilfield cleaning purposes. Truck mounted masts are used to lift sucker rods to allow a flush of the well.
High pressure air, water or steam is used to remove sand, wax and other debris from well site production equipment and storage tanks. This industry also covers pressure services using steam and hot oil treatments to clean paraffin from well casings and includes flushing by services.	A "pig" is a flexible cleaning device which comes in many shapes, with cleaning appendages or studs which are threaded into the body of the "pig". Truck mounted pressure units
Hot oil, water and steam treatments can be used to thaw oil field equipment, storage tanks, pipe lines, and water and sewer lines.	

Relevant sections of OHS Legislation:

Occupational Health and Safety Act

Section 3,4,5 Obligations of employers, workers, etc.

40 Serious injuries and incident

53 Investigation of accidents

36 Discriminatory action complaint
