

## Principles of Health and Safety Management

### Classroom Course

This two-day course is designed to help small and large employers develop and implement a health and safety program in to the workplace. The course includes a comprehensive step-by-step guide, with more than 40 free resources and workable templates.

### Course Topics

- Purpose and benefits of a Health and Safety Program
- Required elements of an effective Health and Safety Program
- Due diligence, responsibility and accountability
- Applicable legislation
- Resources for developing a Health and Safety manual
- Certificate of Recognition (COR) and Small Employer Certificate of Recognition (SECOR) requirements

### Certification

This course has a written test and skills check components. Participants must achieve a minimum score of 80% on an open-book written test and complete nine skills checks for course certification.

### Prerequisites

None required at this time.
