

Working Around Powered Mobile Equipment

Classroom Course

This one-day course is designed to increase awareness of the hazards associated with working around PME and the ways those hazards can be controlled. Workers, safety personnel, supervisors, and employers will all benefit from the completing this course. Incident reviews and case studies of actual incidents will provide all participants with better strategies to keep everyone safe when working around PME.

Course topics

- Overview of PME
- OHS Legislation related to the PME in the Workplace
- PME-related Hazards
- Worker Safety and PME
- PME vs. Vehicles
- Spotters and Safely Approaching PME

Certification

This course has a written test and a skills check component. Participants must achieve a minimum score of 80% on a closed-book written test and complete four skill objectives for course certification.

Prerequisites

None required at this time.
