

## Silica Awareness

### Classroom Course

This one-day course is designed to increase awareness of the hazards, risks, and controls related to respirable crystalline silica in the construction industry. This course will benefit workers, supervisors, and safety personnel as employer and worker responsibilities regarding respirable crystalline silica are addressed.

### Course topics

- Introduction to Respirable Crystalline Silica
- Alberta OHS Legislation and Silica
- Hazard Assessments
- Controls to Reduce Exposure
- Silica Code of Practice
- Silica Sample Toolbox Talk

### Certification

Participants must complete the one-day course and attain a minimum score of 80% on the closed-book written test and complete three skill objectives for course certification.

### Prerequisites

None required at this time.
