

| | |
|-----------|--|
| Pre-Task | <ul style="list-style-type: none"> • Consider the task and follow safe job procedures, industry best practices, and legislative requirements. • Complete a hazard assessment and follow the controls. • Review Environmental legislation and follow best practices. • Inspect all equipment. Complete a pre-trip inspection. • Ensure that barricades and warning signs are in place. • Obtain and follow permit requirements. • Use all appropriate PPE for the task (i.e., FR coveralls, rain gear, gloves, face shields, hard hat, hearing protection and/or bonding mats) |
| During | <ul style="list-style-type: none"> • Ensure all buried facilities are identified and located. • Determine soil type and condition or contamination. Follow the requirements for soil that is contaminated with (potentially) hazardous substances. • Do not stand near the edge of an excavation. Be aware of undermining. • Keep all unnecessary personnel and equipment out of the area. Be cautious of overspray. • Stop hydrovac when unexpected conditions present themselves. Continue operation only after condition is verified as safe to proceed. • Ensure wands, vacuums, and nozzles are specifically designed for the work being conducted. |
| Post-task | <ul style="list-style-type: none"> • Clean and secure equipment after use. • Follow all disposal requirements when transporting and disposing of hazardous materials. • Ensure any open excavation is secured and properly marked once hydrovac procedures are completed. |
